In 2001 it was discovered that it is only the blue component in ordinary white light that causes melatonin suppression. Melatonin is the hormone that promotes sleep and is a powerful cancer fighter. This book traces the story of how research with animals and humans has demonstrated the health benefits of long periods of darkness that maximize melatonin. By blocking just the blue light a condition...

Reviews

This publication can be well worth a study, and far better than other. Better then never, though i am quite late in start reading this one. Its been printed in an exceedingly simple way and it is only soon after i finished reading through this book in which really transformed me, alter the way in my opinion.
